**Subject:** new area code.

To Whom it May Concern,

I know you may have some good reasons for adding another area code. I am making a formal complaint as to the hassle of having to dial the whole 10-digit number if I am calling from an 801 number to another 801 number. A better idea would be to split the areas up. Every other state that I know that has added additional area codes hasn't done it like this, why does Utah have to be so backwards. It is a huge inconvenience and I am very upset that I pay so much for my phone bill already. I hope you find a way to not implement this change in the way you are doing it....it will have many people irritated. Please have some sort of meeting and re-evaluate what you are doing.

Thanks,  
Andrea Konduc
